

Congratulations on your purchase of our world class hammock stand. To help you get the most out of your purchase please read the assembly instructions carefully.
Your stand comprises of the following components

2 feet.

2 base components with 10mm hole 320mm from each end.

2 arms with 10mm hole 320mm from the bottom and 8mm hole 70mm from the top.

6 cup screws 10mm x 150mm with washers.

2 cup screws 10mm x 200mm with washers.

2 cord loops with washers.

You will need

17mm spanner and a hammer for gentle persuasion if needed.

IMPORTANT; ENSURE YOU LINE UP THE ALPHA NUMERIC HOLES ON THE ARMS AND BASE WITH THOSE ON THE FEET

Step 1

Take the base components which have holes drilled 320mm from each end and lay them on the floor. Note the 2 holes on the side of each base, which are countersunk on one side for the head of the 200mm cup screw. Take one arm and line up the side hole with the side holes of the bases and thread the 200mm cup screw through all three components and tighten so the components are secure but not too tight. Repeat process with the other arm.

Step 2

Take one of the feet and line up the 3 holes with the holes on the bases and the arm and thread the 3 150mm cup screws through the bases and arm and secure. Repeat process with the other foot.

Step 3

Tighten all bolts.

Step 4

Thread the loops from the outside of the arm. To hang the hammock thread the loop through the hammock ring and over the top of the arm and rest the loop on top of itself between the washer and the arm to enable you to remove the hammock simply and quickly when not in use. To adjust the hanging length just add another knot to the loop in the most suitable place.

IMPORTANT NOTICE

WE DO NOT HAVE CONTROL OF OUR PRODUCTS AFTER THEY LEAVE OUR FACTORY AND AS SUCH WE CANNOT BE HELD RESPONSIBLE FOR ANY INJURY CAUSED BY INCORRECT OR IRRESPONSIBLE USE OF OUR PRODUCTS.

ALL OUR PRODUCTS ARE IN PERFECT CONDITION WHEN LEAVING OUR FACTORY. IT IS THE RESPONSIBILITY OF PURCHASERS TO CHECK ALL COMPONENTS FROM TIME TO TIME TO ENSURE ALL FASTENINGS ARE SECURE AND THERE IS NO WEAR AND TEAR OF ANY OF THE PRODUCTS.
